

Family Day Home

Accreditation of Early
Learning and Care Services

Purpose

Our Family Day Home program provides a unique childcare choice. Distinctly different than babysitting or Day Care Centres, our Family Day Home program provides Approved Childcare in a home setting while parents still have access to government subsidies. Family day homes provide opportunities for small group social play and interaction. Our family day homes are regulated through the provincial government and are certified and accredited.

Process

A McMan Family Day Home Coordinator provides placement based on need and home availability.

All of our Family Day Home providers are screened by the RCMP and by Child Intervention Services. Drop-in visits ensuring that all safety and care standards are being met are completed on a consistent basis by the Family Day Home Coordinator.

We are always opening new homes.

If you are interested in opening your own Approved Family Day Home, please contact us at central@mcmancentral.ca

Outcomes

Providers receive government benefits, training and licensing opportunities. McMan provides back-up care in the event the caregiver gets sick, and administration services to eliminate money transfer between providers and parents. Parents receive ongoing monitoring of the day home, fair fee scheduling, provider screening and government subsidy.

This program funded by:
Ministry of Children's Services

Where to start?

What success looks like:

To a parent:

"I love my provider!"

"My provider is great at providing educational opportunities; she does very well with this!"

"Most definitely, my children have experienced a benefit from their involvement in the day home program"

To a provider:

"The consultant always interacts positively with the children and myself. The children love it when she comes over to read a story, do a craft, etc."
